Mohd Ansar Bux

Full Stack Developer

Dedicated and efficient Full Stack Developer for creating a complete Web-Application. Certified in Java Full Stack technology. Seeking a full-time position related to Full Stack Developer. I want to work in a place that will improve my skill and enhance my knowledge.

Training & Internship

Pentagon Space Pvt. Ltd. l Bangalore
2022
Java Full Stack Developer
I completed my Full Stack training within 6 months and learn lots of technologies like Core Java, JDBC, Servlets, MySQL Database, HTML5, CSS3, Bootstrap, Spring, Hibernate, JavaScript, JSP, and Apache Tomcat Server. I work with different platforms like Eclipse IDE for creating web project, MySQL workbench for creating virtual Database. With Pentagon Space i completed two projects.

Projects

Online Hostel Booking Web Application
Bansal Group of Institute | 2021-2022
Java Full Stack
We use SDLC technology to implement the project. In frontend we use HTML5, CSS, JS, to create Presentation Logic. In the backend part we use the JDBC and MySQL to create Persistence Logic and In middle part of the project we use Core Java, Servlets and Spring to provide Business Logic. When designing part is complete we use Apache. Tomcat Server for execution.

Calculator App
Practise | 2022
Java Full Stack
Create a simple calculator which can perform basic arithmetic operation like addition subtraction, multiplication or division depending upon. the user input. I use Eclipse IDE for creating the project.
